Wedding

GRANT-LOVE

A pretty wedding was quietly solemnized at the United Church, Oyen, on Wednesday, October 3, 1928, at 7.30 in the evening, when Josephine Alberta, daughter of Mr. and Mrs. John Love of Oyen, became the bride of Mr. Francis Wylie Grant, son of Mr. and Mrs. W. M. Grant, of Wallis, N.S.

The ceremony was performed by Rev. H. C. Woods, pastor of Oyen United Church, in the presence of the following relatives and friends: Mr. and Mrs. John Love, parents of the bride; the Misses Winnie, Catherine and Dorothy Love, sisters of the bride; the Messrs. Henry and Herbert Grant, brothers of the groom; Mr. Karl Venn of Hanna; Mr. John Lockhart and son Fred of Saskatoon, and Mrs. William Affleck of Oyen.

The bride wore a gown of pale pink georgette and looked charming, carrying a lovely bouquet of pink roses and lilies of the valley. Mr. Henry Grant, brother of the groom acted as best man, while Miss Catherine Love was a sweet bride's maid to her sister.

Following the wedding ceremony about fifty guests sat at a sumptuous wedding breakfast served at the home of Mr. and Mrs. William Affleck. Mr. G. A. Morrison acting as toastmaster called on a few of the guests who besides wishing the newlyweds happiness referred to the esteem in which the young couple are held in this community. Mr. Thor Love caused considerable laughter by his reference to the enjoyable function the guests were present at and the excellent probabilities of several more such joyous occasions, the bride being one of a family of eight charming daughters. Mrs. F. C. McClean, whose humor is delightful, made reference to the son Mr. and Mrs. Love have acquired and the several others that will join the family as time goes on.

The remainder of the evening was devoted to dancing until train time, when Mr. and Mrs. Grant were given an hilarious send off at the depot on leaving for Calgary to spend a short honeymoon.

On the Friday preceding the wedding a shower for the bride was arranged by Mrs. I. L. Morrison and Mrs. M. G. Whitlock. This function was also held at the home of Mrs. Affleck and the bride elect received many beautiful and useful presents from the fifty odd guests present.

Dial's Auction Sales

Under instructions from Dr. H. C. Swartzlander, I will sell at public auction, at his residence in Oyen, on Friday, October 12, his entire household effects. Sale to commence at 1.30 sharp. B. H. Dial, auctioneer. See bills for list of articles.

Under instructions from Mr. John Broaden, I will sell at public auction, at Sec. 28, Twp. 30, Rge. 2, his farm machinery, horses, cattle, household effects etc. on Saturday, October 13. Lunch served. Sale to commence at 1 o'clock sharp. B. H. Dial, auctioneer.

For Sale—House on Main Street, Oyen. Apply to: W. V. Miller.

Yanks Win World

Series Four Straight

The New York Americans won their second consecutive world baseball championship yesterday when they took the fourth straight game from the St. Louis Cardinals by a score of 7-3. Five of the seven runs scored by the Yanks in the last game of the series were "home runs"; three from the bat of Babe Ruth, and one each by Gehrig and Duro.

The score by innings in the four games:

Oct. 4, at New York.
St. Louis 000 000 100-1 3 1
New York 100 200 01x-4 7 0

Oct. 5, at New York.
St. Louis 030 000 000-3 4 1
New York 314 000 10x-9 8 2

Oct. 7, at St. Louis.
New York 010 203 100-7 7 2
St. Louis 200 010 000-3 9 3

Oct. 9, at St. Louis.
New York 000 100 120-7 15 2
St. Louis 001 100 001-3 11 0

Home runs in the series were scored as follows: First game, Mousie (Yanks). Bottomley (Cards). Second game, Gehrig (Yanks). Third game, Gehrig (Yanks) 2, one with Ruth ahead of him. Fourth game, (Yanks) Ruth 3, Gehrig and Duro.

And that's that.

Snow Storm Plays Havoc With

Telephone and Telegraph Lines

The rainfall of last night turned to snow this morning and by 8 a.m. a blizzard was in progress and the heavy wet snowflakes were soon playing havoc with telephone and telegraph wires, several of which were out of commission by noon. The storm raged on well into the afternoon before showing signs of abating. At time of going to press it is impossible to estimate the damage done to pole lines, but it is certain to be unusually heavy.

The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade, both domestic and foreign, is expanding as never before, and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history, mining discoveries and operations are proceeding on an unprecedented scale, factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good, and population increasing.

Important and gratifying as this material growth and prevailing prosperity is to our people, a much more vital matter to Canada is whether the Dominion is likewise making progress in those other directions which are essential to the upbuilding of a nation in the true sense. Are the Canadian people becoming merely a nation of money-mongers, measuring their success in terms of dollars and statistics regarding economic development and growth, or are they utilizing the larger advantages and increased power which material prosperity is conferring upon them to encourage and develop those arts and characteristics which stamp a people as truly advancing to greatness?

We believe again generally point to the fact that the people of Canada are, taken as a whole, more intensely interested today in the spiritual, intellectual, moral growth of their country than at any previous period. That, in fact, they are deeply concerned, and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would probably gain by absorption by the United States. But Canadians are insistent that quality rather than quantity shall be the governing factor in our immigration policy, and it would be hard to muster a corporate guard of out-standing men who favor the policy of United States annexation.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British people within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, and to that extent retard the good work, but they are conscious that the people of Canada are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical festivals and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications of a better class, all go to prove that the people of Canada are not wholly materially minded.

The wonderful success which has attended the application of co-operative principles in the solution of production and marketing problems, and in the provision of public services for the use of all the people, is having its inevitable effect upon the minds of all people. To an ever increasing extent they are beginning to realize that if through local co-operation they can remedy material evils and advance their individual and corporate welfare, through the acceptance of the same principles and their application to all phases of community, provincial and national life they can greatly advance the welfare of the country as a whole.

Co-operation is better than competition or antagonism. Sympathetic consideration and helpful co-operation is better than hatred and the maintenance of bitter enmities. In the practical application of co-operation the Canadian people are learning that there are two sides to almost every question, that people who may differ with you are just as sincere as you are, and that the road to ultimate success and the greatest good to the greatest number lies along the path of friendly compromise rather than in continual enmity and warfare.

Canada's progress is, therefore, a well balanced progress, and because of this gratifying fact the people of the Dominion may look to the future with the very gratifying fact that the people of the Dominion may look with unbounded confidence to the future if their great country.

A Railway Revolution

Train in England Electrifies Line as it Travels

A train which has puzzled many people has been running over a portion of the L.M.S. railway in England, says an article in "Answers". It looks like an electric train, and

To Aid Farm Workers

Clearing House to Furnish Winter Farm Employment May be Established

While no definite decision has been reached yet, a central clearing house, from which British miner-harvesters will be furnished winter employment may be located in Regina. The establishment of such a bureau, though not necessarily in this city, is expected to be the outcome of a conference held at the Parliament Buildings, Regina, on September 12, attended by representatives of the Federal and Provincial Departments of Colonization, those of the two great railways, the Government Labor Service and the United Farmers of Canada, Saskatchewan section.

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Limbs—No Use

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. When the blood treatment these poisons increase, the joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, but with every unfavorable condition a renewed attack follows.

To treat rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new blood cells. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most important factor in their cure, as shown by the statement of Mr. David Carroll, Picton, N. S., who says: "For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many other things, but did not get more than temporary relief. Only those who have suffered from this trouble will understand what I suffered at times. I had begun to despair of getting better. A friend urged me to try Dr. Williams' Pink Pills. In a short time I could feel this medicine doing its work. I continued taking the pills and soon found that the rheumatism had disappeared and there was a general improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of rheumatism since. That is why I confidently recommend this medicine to all sufferers."

Get these Pink Pills from your medicine dealer or by mail at 50c a box from Dr. Williams' Medicine Company, Brockville, Ont.

Writes—Do you think you've improved "Richard III" much by rewriting it?

Playmate—Sure. It was way out of date. In my instance where Richard, "A horse! A horse! My kingdom for a horse!" I have him shout, "A plane! A plane! My dictatorship for a plane!"

The Poor Man's Friend—Put up in snare box for those who are easily portable and sold for a very small sum. Dr. Thomas' Electric Bells are a powerful power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Twenty years ago half of the population of 200,000,000 women got girds in China had crimped feet, but today almost every village has a woman's shoe store which displays an attractive array of footwear.

For Years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

If a huge clutter, large enough to cover Trafalgar Square in London, as high as Nelson's column, were built as a water-tank, London would empty it twice daily.

CUTICUR HEALS SKIN TROUBLE

Sore Eruptions Broke Out Over Face, Itched and Burned.

"My trouble began with little sore eruptions which broke out over my face. They itched and burned so that I always wanted to scratch and scratch. At times they got larger and then died up. Some nights I could not sleep very well."

"I tried all other remedies but they did not help me. I had the trouble over five weeks when I began using Cuticure Soap and Ointment and in two weeks I was healed." (Signed) George W. Smith, 35, Chipman, Alta., Oct. 8, 1927. Full use of Cuticure Soap, with touchings of Cuticure Ointment as required, keeps the skin fresh, smooth and healthy. Cuticure is an ideal toilet product.

Get Cuticure from your medicine dealer or by mail at 50c a box from Dr. Williams' Medicine Company, Brockville, Ont.

Engineering Feat a Success

An engineering project, unique in Canadian industry, was declared a success at Port Arthur, Ont., when tests were made of a pipeline by which ground pulp in dust form is carried from a grinding mill of the Thunder Bay Paper company, at Current River, to the paper mill two miles north. The tests were highly satisfactory, taking the Thunder Bay management. The pipe is of cast iron, ten inches in diameter, and two miles long.

Wife (reading the paper)—"It says here that an London for 20 years?" Her Husband—"That's long enough. He ought to return it."

Headache? Relieve with Minard's Liniment.

DEAUBRY LEMAN, General Manager
Basque Canadiane Nationale

Tramways company, and Asbestos corporation, Bora, Montreal, Jan. 2, 1878, son of Dr. Joseph Beaudry Lemah, educated Mount St. Louis College, private tutor, University of Lille, France, McGill University, Mayor of Shawinigan Falls, Que., from 1901 to 1907; member Electric Service commission, Montreal, married to Catherine Beique, daughter of Hon. F. L. Beique, May 12, 1908. Have three sons and two daughters. Address 597 St. Catherine Road, Outremont, Quebec.

Junior League of British Nations

Proposal to Form Branch of British Empire Parliamentary Association

"To the British Empire, at least, it would be a real junior league of British nations," stated M. A. MacPherson, J.L.M. for the Regina constituency, when speaking of the proposal of the government of Saskatchewan to form a branch of the British Empire Parliamentary association.

The Regina member further expressed his opinion that such an organization, having as it does, the aim of trying to bring the different nations and colonies of the British Empire into closer understanding and contact with each other, would most certainly be a splendid one for the province to adopt.

It is proposed that at the next sessions of the legislatures of the four provinces of Ontario, Saskatchewan, Alberta and Manitoba, this subject be presented to the members of the respective assemblies and with their approval, the work of organizing such an association be definitely undertaken.

The Oil for the Farmer—A bottle of Dr. Thomas' Electric Oil in the farmer's tool box will make him a doctor. It is not only good for the farmer's horse, but for his sick cattle and sheep, and for the farmer who suffer from pains and aches, but there are directions for the use of the sick cattle. There should always be a bottle of it in the house.

Canadian Amateur Golf Championship

Will Be Held at Jasper Park Lodge Next Year From August 10 to 24

Authentic information was received at Jasper National Park by the visiting Senior Golfers from Great Britain that the United States National Amateur golf tournament will be held next year over Pebbles Beach, Calif., from September 2 to 7. With dates now definitely assured it is also possible to state positively that the Canadian Amateur championships will be held over the Jasper Park Lodge golf course next year from August 19 to 24. The defining of these two important dates in the golfing program for 1929 leaves an interval of a full week between the Canadian and U. S. Amateur events and it is more than likely, therefore, that the Canadian championships will attract a large number from the gallery of stars in the United States and other countries who will be bound for the U. S. event, should these hopes be fulfilled, and every effort is to be made by the Royal Canadian Golf Association and the Canadian National Railways to bring them to fruition, the 1929 Canadian Amateur championship will be the greatest event in the history of golf in Canada.

Tombstone Dealer (after several futile suggestions): How would just a simple "Gone Home" do for an inscription?

The Widow: I guess that will be all right. It was always the last place he ever thought of going.

Speaking of serious reading, how is this from the bank, "Your account is overdrawn."

Compulsory Marking Of Eggs

Buyers in England Would Know Product Was Canadian

In consideration of the fact that there is apparently a growing tendency in the British Isles for Canadian importations of agricultural products—especially butter and eggs, the Minister of Agriculture and Fisheries of the United Kingdom has now recommended through the committee appointed to deal with such work that an order in council should be made prohibiting the sale of eggs in foreign countries for export to England unless they are marked.

The regulations as to marking are that every egg shall be marked durably in ink in letters at least one-sixteenth of an inch high. Every egg shall bear this mark—the name of the country from which the eggs are to be shipped. This information was received from a bulletin issued by the Saskatchewan Department of Agriculture.

Further the report states, the motive for such an action is to assure the buyers of the Old Land that they are getting products which have been produced in the United Kingdom. There is undoubtedly a growing demand for this trade, and in view of the fact that the Dominion government has recently taken steps to make such restrictions as will invariably raise the standard of the Canadian product, there is every likelihood of there being a huge increase in the trade in agricultural products in the near future.

This increased interest on the part of the consumers should be appreciated by Canadians, and report intimates, in view of the fact that up to date the exports of such commodities have been small as compared with other countries in the Empire or without.

"This action was taken by the Empire Marketing Board to encourage the egg consumers of the Mother Country to buy Canadian products, and that this idea of marking them with indestructible ink so that the name of the country should not be destroyed even after the egg was boiled, would assist Canada in their natural desire to patronize Empire products," quiting this report further. Figures showing Canada's exportations to the United Kingdom for July this year show the following results: Dressed poultry was exported to the value of \$2,000; butter to the amount of 4,485 cwt.; and eggs to the value of \$17,165, as compared with a total importation value of eggs to the United Kingdom of \$5,825,070.

Fish From Northern Lakes

Thousands of Pounds Shipped From Alberta to Eastern Cities

The map of Canada is being rolled back so far as the economic handling of fish from the northern lakes is concerned, according to the progress made in the shipment of Lake Athabasca trout and whitefish to such markets as Chicago, New York and Toronto, says the Financial News. The fishing being carried on by two companies at Lake Athabasca, in Alberta, constitutes the most northerly commercial operation in Canada, the extent of which is indicated by R. T. Todd, Federal Inspector of Fisheries, who on his recent return from an inspection trip stated that 62,000 pounds of trout and 4,000 pounds of whitefish were taken from the lake in the first three days of the summer fishing season.

First Grain Shipment to Spain

The first shipment of wheat from Montreal to Spain left the city on Monday. The cargo consisted of 201,132 bushels. Wheat shipments to foreign countries last year amounted to 118,277,750 bushels from Montreal, but not a single bushel was exported to Spain among the seventeen countries to which grain was consigned. This is said to be the first shipment of grain ever made to Spain.

"Atrocious! A mouse in the soup!" Landlady: "The mouse was in the soup. But why should you worry? You are not a vegetarian!"—Buen Humor, Madrid.

Canada Has Extinct Volcano

Geologists Working in B. C. Say Eruption Occurred 300 Years Ago

Less than 300 years ago Canada possessed an active volcano, in the opinion of experts who have been studying the mountains north of Alice Arm, in the northeastern section of British Columbia.

The volcano, according to authorities, is now definitely dead and there is now no danger of further eruption. There were apparently two pronounced eruptions which have left their trace and they were separated by a period long enough to allow the lava to cool. The first eruption blew out a crater about 400 yards in diameter after a period of quiescence sufficiently long to form a hard and level floor in the crater there was a second eruption which formed a cone or scoria of cinders, within the original crater, 300 feet long with a crater 200 feet deep. It was from the base of this cone that the lava flow proceeded.

From the volcano the lava flowed down a creek valley in a stream 300 yards wide until it entered the valley of the Tseax River. Crossing this river to the west side, it completely buried the houses and other buildings of a small village, and then turned a lake nearby. The lava here turned north and continued down the valley of the Tseax in a stream about 100 feet wide, as far as the River. By the time it reached the Nias the lava had lost much of its burning heat, and the lava spread out down the left bank for six miles. Indians living near the extinct volcano say that the last eruption was about 100 years ago, but geologists discovered three 170 years old growing along the edge of the lava. They place the time of the eruption at about 300 years ago.

Cost of Raising Dairy Heifers

Record is Kept at Experimental Station in New Brunswick

An accurate record of the cost of raising dairy heifers was kept at the Fredericton, New Brunswick, Experimental station. One lot of five heifers including one Ayrshire and four Jerseys were fed and fed together from birth until they were one year old. They were fed on whole milk until four to six weeks old and then gradually changed to skim milk. When the calves were three months old they received in addition to the skim milk, one part of flax seed and four parts of oat meal cooked and made into a porridge. Each calf was fed from one-quarter to one pound of this gruel per day, the amount fed depending upon the ages and condition of the calves. They also received hay, roots and some dry grass. The composition of the dry grass mixture was varied from time to time but was made up chiefly of three parts straw, two parts crushed oats, one part oil cake, and one part brewers' grain. The aim in feeding was to keep the calves growing and to avoid a setback. The composition of the ration in his 1927 report, published by the Department of Agriculture at Ottawa, shows the detail of the feeding and the cost of the feed, which amounted to \$65 for the three calves during the year.

Canadian Cattle for Australia

Shipment of Purebred Stock to be Sent From Brandon, Man.

The Australian government has just completed a deal for sixteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeders of Brandon. The animals will be selected from Mr. McGregor's Glenora herd by the head breeder of the Australian government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment, apart from some purebred dairy cattle for the Orient from British Columbia, is said to be the first exportation of purebred cattle from Canada overseas.

Conditions Have Changed

The pioneer who came to Canada 100 years ago, cut all his bridges behind him. He spent his last cent to get here, hundreds of miles of forest and stream divided him from the coast and there was a six weeks' ocean voyage after that. The only way out was to work, to work for thirty, forty, fifty years and some day he might reveal his homeland at his own expense.

What is thought to be the world's biggest tortoise arrived at the London Zoo recently. It weighs about 300 pounds, is three feet six inches long, and is nearly 100 years old.

"Digging is a good hobby for a married man," says a woman. But why does he so often call it golf?

STRAITFORD-ON-AVON FESTIVAL COMPANY

Members of the Stratford-on-Avon Festival Company photographed on board the White Star liner Laurion, on which they arrived in Montreal recently. The company will make a tour of the principal theatres in Canada and the United States.

Scientist Denounces War

Always Loves Something To Be Settled, Says Sir Oliver Lodge

Sir Oliver Lodge's recent discourse on war created considerable attention throughout England due to the scientist's strong language.

"War is ugly, disgraceful, dirty, objectionable business," he said in a presidential address to the Federation of Southern Counties Brotherhood.

"We ought to be ashamed of it. Digging ourselves into the mud and pretending to be civilized people. Crawling about under the water and sinking each other's vessels is no occupation for gentlemen."

"Deputies must be taken to somebody that settles them. War does not settle anything, but leaves something to be settled."

Russian Colony in Paris

Refugees Fleeing From Bolsheviks Accepted Work in France

The Russian revolution added to Paris a foreign colony which now contributes more to the favor of or against the Russian cause than any other alien group. France was the first European country to offer wholesale asylum to the millions of the Russian nobility when they poured across their borders ahead of the Bolshevik terror. France offered these gently born and reared people work, and they accepted it eagerly. Some 300,000 eventually established themselves in Paris, about one-fifth of these in France.

English bank rate remains unchanged.

Made Fortune in Northland

Prospector, Taking Trip for First Time in Thirty-Three Years

Hector Morrison, from the silver camp at Keno, Yukon Territory, is bound for the outside world for the first time in a generation.

Morrison has relatives back in Woodstock, Ont., and many of them he has not seen since the beginning of the present century. Others have been born and grown up since he went away in the spring of 1885 to seek his fortune in the northland.

Morrison was there for the first gold stampede and in 1896 he camped on the site of Dawson, which was to become the hub of the mining industry. Since then he has lived continuously in the Yukon, following placer mining in the Dawson district until 1918, when he went to Keno and staked a quartz claim the following year.

"I've been enough of the world's goods to keep me from 'yearning,'" admitted Morrison, who clasped up a fortune when he sold his holding to the Treadwell Yukon Limited. "But I'm not quitting the Yukon. I'll never feel rich enough for that. Money can't always buy happiness and I'll be happy only in the north." Six months of civilization, Morrison thinks, will be enough. Then he'll be the northern turn again.

Miss Olive Williams runs an aviation school on Long Island and already has 150 men in her classes. She teaches mechanics, engineering, airplane construction and navigation, as well as mere piloting.

Wireless should be as compulsory as lifeboats on all vessels today.

No Waste in China

People Are Extremely Careful and Make Things Last Indefinitely

As a nation we are rather inclined to be unkind to waste. The Chinese are just the reverse. They waste nothing, and seem to have the knack of making household ware, for instance, last indefinitely.

As a result of this craze for economy crowds of tinkers, cobblers, and menders of all kinds are able to earn enough money to supply their few needs.

A mender of china ware is called Fou Kott, and through the streets he wanders in his happy-go-lucky way, seeking work. Across his bare shoulders is suspended a box of tools at the end of a long bamboo pole, and as he goes he cries out his calling in shrill accents.

Every now and then a door opens and the owner of the house gives the Fou Kott some dimes or other household crockery to mend. A lot of content spreads over his face, for he depends largely on his customers for his morning and evening bowl of rice, which to him mean all the difference between happiness and the reverse.

He sits down then and there, quivering of the fierce sun that beats down upon him while he performs his task.

"Well, Algy, I hear you have taken up walking as the doctor ordered. How does it go?"

"Seems a bit awkward at first without a visor," said Sheffield News.

In 1927 the output of Canadian dairies was valued at \$123,927,256.

Planning Against Air Attacks

Considering Means to Counteract Effect of Gas Bombs in London

Novel measures to counteract the effect of deadly gas-bombs dropped by aeroplanes on London in possible future wars are being considered, but such experts as are suggested would cost enormous sums and would provide only a small measure of protection against such a destructive force as could be launched, judging by the recent mock air attack last London experienced.

Emergency supplies of gas masks for every man, woman and child would be one measure of safety. Another would be the installation of every air-raid of the ordinary houses of "seals" of chemical antidotes, which would render each house gas-proof. A third precaution is the training of special gas squads, men wearing gas proof clothing and masks and equipped with a spraying mechanism to lay down neutralizing gas clouds in the streets.

And the provision of "community" dugouts is suggested by subterranean chambers, or the building of five-story garages underground on the condition that these could be used as bomb-protection in time of war for large numbers of people.

The verdict on the giant attack makes many gloomy predictions. It is estimated that a national warfare at least 500 tons of bombs would have been successfully launched on the capital. Although some losses from anti-aircraft fire and the defending fighters, more than half the "casualties" bombers evaded the defence. The time factor is stressed by those who figure that at least 11 attacks were in progress before the enemy planes had been in sight of London for more than an hour.

Devoting Time to Writing

Sir Conan Doyle Giving Up Lectures on Spiritualism

Sir Arthur Conan Doyle, noted English spiritualist and parent of Sherlock Holmes, has abandoned his vigorous missionary campaign on behalf of spiritualism.

The steadily increasing strain which the growing demands upon his time for lectures has brought about, is said to have been the result of his partial retirement from the world of Occultism, he says.

Sir Arthur's retirement was foreshadowed in the International Psychic Gazette, and he confirmed the report declaring he desired to devote more time to writing.

"My remembrance of writing on a larger scale, however, does not mean the resurrection of Sherlock Holmes," he said.

"I am simply abandoning my lecturing and church work due to the demands upon my time. It must not be taken to indicate that I have lost interest in spiritualism."

Sir Arthur will sail October 25 for South Africa, the only English-speaking section of the world where he has not yet lectured, and will give a series of lectures there which he completes his life's work," he said.

First Shoes Were "Straightlugs"

The "made in Canada" shoe first appeared in 1807. For several years Canadian-made shoes were in the form of "straightlugs" and it was not until 1838 that the first leather shoe introduced into Canada's shoe industry. As late as 1900 "straightlugs" were still manufactured in Canada.

Customer (in dog shop): But are you sure he's really bopped? Mrs. Jones: I'm sure he is, but ter git the best out of this little dog, yer 'uband will 'ave to wear spats 'n' a tall 'at.

Mrs. Jones: Have you a speaking acquaintance with that woman next door?

Mrs. Blanks: A speaking acquaintance? I know her so well we don't speak at all.

"The gentleman in No. 13 has sent me a declaration of love."

"I can believe it. He has the unusual number."—Flegende Blätter, Munich.

An Ancient Landmark makes way for Progress

History on these western prairies has been lived within the past fifty years. Many a man and woman, in the provinces of Saskatchewan and Alberta, remember the day when the first shingled house was built, when the brick arrived for the first public building.

There was recently brought to the attention of the Canadian Pacific officials an old building at Cassidy, Alberta. It was rapidly falling to pieces, and the question arose as to the manner in which it should be destroyed. Queries were made but no memory reached back to the day

when the log section had not flanked the main line of the railway at that point. Finally an old sectionman, reminiscing around the warm stove at Cassidy Station, told a yarn concerning the day, the very cold day, on which he went into the section house and lighted his pipe. Suddenly there was a blaze, and the smell of gas, which he went into the room, used which was found a natural gas hole. The fire was extinguished and the news of the discovery noised abroad. Then the ancient site of Cassidy came to light and it was learned that the logs for the section house

had been brought on flat cars from Castle Mountain near Banff. They had formed a shack in the construction days of the railway. This was more than thirty-five years ago, and when the building was completed, it was probably, with the exception of police stations, the first public building between Calgary and Winnipeg. It will now go the way of all ancient things, for its site will now be the earth on the spot where the logs so long did their duty in serving their day and generation. The new section house has already been constructed but its life, it is safe to say, will not be so long as its predecessor.

Reward and Garnet, New Wheat Varieties, Now Holding Attention of Western Growers

Mr. L. H. Newman, Dominion Cerealist of the Experimental Farm, returned to the East recently from an extensive tour of Western Canada. During the trip practically every wheat growing area was visited. Mr. Newman states that the newer wheat, Reward and Garnet, are holding the attention of the western growers.

Some 407 farmers are this year testing Reward wheat. The variety is reported to have done well, though actual figures on yield, etc., have not yet been compiled. Mr. Newman stated that it had been impossible to determine anything definite with regard to this variety's rust resisting qualities because there was practically no rust in Manitoba and very little elsewhere. Conditions generally in the west Mr. Newman describes as distinctly above the average.

Particularly good are the reports on Garnet wheat, one of the originations of the Experimental Farm. Writing on the subject of this remarkable wheat early this year, the Dominion Cerealist stated "the history of Garnet wheat is almost an epic in the realm of scientific achievement. It reveals a story of almost half a century of patient but determined effort, replete with discouragements and disappointments but rewarded ultimately by definite and indisputable gains."

In 1914 Garnet wheat was included in the regular variety test-plots at the Experimental Farm. In 1919 it was tested at the Experimental Farms in the Prairie Provinces. In 1925 the branch farms were able to send 320 acres, from which was produced about 8,700 bushels. In 1926, some 6,554 bushels of Garnet seed were offered to prairie farmers, with a four-bushel limit. Some 2,530 farmers, including 867 soldier settlers, secured two to four bushels lots and this, together with seed from increasing test samples by two or three seed growers, made a grand total of some 14,000 bushels, or enough to seed 12,000 acres.

This year Garnet wheat was observed growing in all parts of the west. The section east of Prince Rupert and north of Thicket is practically all Garnet country. It is an early maturing variety, and produces a high proportion of grain to straw. This season sections east in Saskatchewan on August 22 damaged the immature wheat, but Garnet demonstrated its ability to mature before the frost. It usually ripens a day or two before Ruby, from six to twelve days ahead of Marquis, and three or four days before Reward. This variety has also behaved well under drought conditions.

In 1920 it was reported wheat would never grow in the Peace River country. This year Garnet was being cut here on August 21. Crops were more advanced in the Peace River district than further south, and some of the west's finest crops were seen there. Dr. H. G. Orfield, Deputy Director of Agriculture, was with L. H. Newman, driving through the Rio Grande section of the Peace River on August 22, where he saw the first varieties of wheat, and of these 16 were Garnet, 7 Marquis, 5 Huron, 1 Turkey Red, 1 Ruby and 1 Reward. This indicates the way in which Garnet wheat is spreading in the west. As an early maturing and good yielder, it has no equal, and once more the Experimental Farm Branch of the Dominion Department of Agriculture must be credited with an epoch-making contribution to Canadian agriculture.

Life Guard—"How much can you carry?"

More Man—"Two hundred pounds."

Life Guard—"Suppose there was a woman out in the water drowning and she weighed four hundred pounds. How could you save her?"

More Man—"I'd make two trips."

WEDDING OF SOCIAL PROMINENCE

Hon. Robert Furke, minister of immigration, has just announced the marriage of his daughter, Elsie May, to Charles J. McFarland, formerly of Los Angeles and now of Vancouver, the marriage having taken place in Vancouver recently.

Whether Lady Cynthia Mosley and her husband, Sir Oswald Mosley, Labor M.P. for Southwick, England, will accept the baronetcy made vacant by the death of Sir Oswald Mosley is a matter of conjecture. Both scoff at titles. Lady Cynthia is the second daughter of the late Marquis Curzon.

Winnipeg Newspaper Union

Looking Slender
An unusual one-piece dress, cleverly designed to make its wearer appear more slender, with panel front perforated to be cut apart to use contrasting fabrics or colors, as illustrated. A narrow belt, attached at either side of front panel, holds in fullness through the waistline and lies in youthful bow at back. The shaped collar is smart, finishing the flatter square neckline. Style No. 224 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

one material, only takes 3 1/2 yards of 40-inch. Printed and plain silk crepe, crepe satin using the two surfaces, printed and plain shantung, printed and plain linen, two tones in flat silk crepe, jersey, sheer woolsens or canton-fabric, crepe are usually pleasing combinations. Pattern price 25 cents in stamps or coin (no preference).

We suggest enclosing 10 cents additional for a copy of our Fashion Magazine.

SCOFF AT TITLES

Shows How British Columbia Was Retained For Canada By Work of Early Pioneers

Wintering Bees Outside

Tells How Bees Are Successfully Wintered Out-of-Doors

At the Central Experimental Farm at Ottawa a large number of colonies of bees are successfully wintered out-of-doors each year. In its report for 1927, the Dominion Agrarist tells how the bees are protected and fed. The cases used are four-colony and two-colony and single cases are also used. In packing, planer shavings are used of which three inches is placed under the bees, four or five inches about their sides, and six inches to eight inches on the top. Thirty-eight colonies were wintered on honey and forty-four on sugar syrup. Of those wintered on honey, thirty received shallow food chambers, and eight received deep ones. The bees were able to fly up until November 8 and after February 24. Towards the end of April when the colonies were examined it was found that those wintered on honey were in worse shape than those of the sugar syrup fed group. Eight of the colonies died, of which six received honey and two received syrup. By the tenth of May it was found that in all the live colonies the number of frames covered by the bees averaged 65 per cent.

Brushers Who Stick

Ninety-Five Per Cent of Harvesters From Britania Have Made Good

Notwithstanding the concentrated efforts of a well-organized even though largely cotieric of Communist, ten thousand British miners came to the prairies, and an unexpectedly high percentage of them are remaining to meet the challenge that is Canada's. That challenge of this great Dominion is one that offers to miners the best there is in life, exemplified by the fact that an immigrant of two decades ago is a senior member of the federal cabinet. Less than five per cent of the ten thousand miners have gone back, among these are some physically unimpaired, others mentally disqualified. Some came with the purpose of making the trip a vacation junk, many others came with "communist" from instruction to foment trouble—and, yet 95 per cent remain. It is an outstanding defeat for the powers of communism who sought to bring discredit upon both the British workers and upon the Canada that harbors all too many of this type with much too tolerant indifference.—Canadian Fusion.

A Billion Bushel Crop

Prediction Is Made That Canada Will Produce This Much Wheat Annually in Short Time

The 550,000,000 bushel wheat crop, which Canada is harvesting this year, is the "Old World's" largest in a recent issue to predict that within a comparatively short time the wheat production of Canada will total 1,000,000,000 bushels annually. If this happens, and the estimate is based on a consideration of the trend of wheat production during the last decade, it will entail a tremendous expansion in railway building, elevator construction, sales of agricultural machinery, and general manufacturing. The total wheat production of the world this year is estimated to be 2,600,300,000 bushels or 50,000,000 bushels more than last year.

With Russia still importing wheat, the Oriental demand growing, the domestic demand increasing, and with the growth in population, it is logical to assume that the wheat production in Canada will continue to increase.

Not Allowed To Forget

A fellow who does not often go to the races attended a meeting one day and had his wallet stolen. This fact he was unlikely forced to report to his wife. The story of his misfortune got around and one day a business acquaintance said to him: "Have you heard anything about your wallet?" "Yes," replied the owner victoriously, "I have, morning—noon—and night!"

The park-keeper found a tramp asleep on one of the seats. "Hi, son!" he cried, shaking the man's shoulder. "I'm going to close the gates."

"All right," murmured the tramp sleepily. "Don't mind, son, will you?"

Wash the mauling of the telephone frequently to keep it in sanitary condition.

Had it not been for Sir George Simpson, governor of the Hudson Bay Company, whose historic visit to the Pacific coast a hundred years ago was celebrated recently at the Central Experimental Farm of British Columbia would be in the possession of the United States, and Canada would have no outlet to the Pacific Ocean.

Perhaps this statement, made by Mr. Charles Vincent Sale, president of the Company of Adventurers, did more than anything else to impress on the minds of those gathered at Fort St. James, B.C., the centenary the importance of the exploits of the man who has been called the Cecil Rhodes of Canada. The story of a century ago was brought vividly before their eyes in a pagant which resurrected Simpson's journeying across the wide stretches that ultimately became the Dominion, but after all, the living picture of the governor and his retinue standing at the fort could not indicate the far-reaching effect even of his activities were to have in the history of North America.

Fort St. James in those days," said Governor Sale, "was the outpost of an empire; the visible sign of a century of occupation; a centre of government." He went on to tell of the claims of Spain to all the coast south of the Russian possessions, of Spain's warring her claims in favor of the United States.

"Our American neighbors," he said, "were disposed to believe that the title was clear to all the south of the Russian possessions. And so it might have been but for the fur traders such men as Alexander MacKenzie, Simon Fraser, John Stuart and Sir George Simpson.

It was in the struggle between the Northwest Company and the American interest for the country west of the Rocky Mountains that Simpson's name became prominent in 1806. The Astorians came and vanished and in 1821 the United States proclaimed her right to the Pacific coast. It was Sir George Simpson became the Hudson's Bay Company governor. Three years later, Simpson, put the affairs of the Columbia district in shape and save the coast from the United States and Russia. Simpson's name is on the map of the Pacific coast, making the journey in 84 days, 20 days less than any previous voyage, and established the company's headquarters in such a way as to mark the limits of what he thought should be British territory on the west and south.

Oriental Use Old Papers

Manufacturers of Fireworks and Novelties Find Them Indispensable

Old newspapers may be a problem to you, but in China and Japan they are practically indispensable. Reports to the U.S. Shipping Board show that old newspapers constitute a large share of the ship's cargoes destined for Oriental ports. One day recently newspapers shipped from Los Angeles alone weighed 5,000,000 pounds.

Oriental firecracker and novelty manufacturers use the papers in their products. Total shipments for 1927 to the Orient amounted to 70,018,000 pounds, valued at \$685,420.

A.—Have you seen the conjuror over in the side show?
B.—Nay! I suppose it's the usual humbug.

B.—No, sir! This man is a wizard and a real artist. I handed him a counterfeited bill to work with, and he gave me back a real one.

The Chemin de Fer du Nord has always held first place among French railways for speed.

THE FIRST MOOSE TROPHY

Bringing out with them, the first moose shot in opening of the 1928 hunt. Mr. Oscar Hock, of Miami, treated from La Tuque, Que., at the first hunt in the Vermillion after Armand Tremblay. The Hock had an appetit spread of from being the largest secured trophy and was shot in the which the hunting opened.

what was probably since the Quebec since the ing season, Mr. and Florida reached Montreal, the conclusion of a successful river season out-moose secured by 47 inches and while far in the preserve, was a splendid early morning of the day.

WORLD HAPPENINGS BRIEFLY TOLD

One of the finest old churches in Moscow, the "Stranyan Monastery," is being converted into an Anti-Religious museum.

Leon Vanderstuyt, Belgian bicycle rider, broke the world motorcycle record for sustained speed when he rode 74.4 miles in one hour.

A report is current in Bucharest, that Poland, Roumania and Greece have concluded a military agreement to make a common front against Russia in the event of war.

Thousands of cattle have been drowned in the flood that came after the bursting of the Yser dykes in Belgium and farmers estimate their damage at about \$25,000,000.

The Canadian Press was reliably informed that there is no reason to believe that the Duke and Duchess of York contemplate an early visit to Canada, as rumored in Ottawa.

T. Nichols, of the Royal Canadian Mounted Police, Lethbridge, Alta., will receive the Imperial Service medal awarded by His Majesty the King, according to the Canadian Gazette.

Great Britain and the U. S. have continued for another year their agreement on administrative co-operation for the prevention of smuggling liquor into the United States by ships flying the British flag.

It was reported in League of Nations circles that the Irish Free State, following the example of Canada, is planning to establish a legation in Paris and appoint a minister to France.

The appointment of Jean Knight as French minister to Canada has been announced officially, confirming previous intimations that M. Knight would be sent to Ottawa as France's first diplomatic representative in the Dominion.

Fine Shipment of Herefords

Range Cattle From Alberta Bring Large Sub in Chicago
Ninety-three head of dry cows from the McIntyre ranch in Alberta were recently consigned to Chicago in exchange for a \$10,000 cheque. Cattle-men looking over the shipment claim that it is one of the finest lots of range cattle ever forwarded from Calgary. The heaviest animal in the lot tipped the scales at 1,700 pounds and the ninety-three averaged 1,350 lbs. These cattle come from one of the few remaining old-time ranches which is running a herd of upward of 5,000 Herefords.

Men's bells are used mostly for sports wear in Great Britain.

Ships that cannot afford wireless cannot afford crews.

Reinforce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestine sour.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Dr. Williams' Pink Pills of Magnesia prescribed by physicians. It has been the standard with physicians everywhere.

Protect Submarine Crews

Italian Has Invention That May Prove of Great Value

Cesare Borghetti, inventor of an apparatus for saving the lives of submarine crews in case of danger, has succeeded in interesting the Italian government in his invention and now gives the press some details of his amazing invention.

Borghetti's apparatus consists of several hollow cylinders attached to the sides of the submarine in such a way that they do not impede its passage through the water. The number of these cylinders depends on the number of men in the crew.

The outer chambers are reached by two doors from the interior of the vessel. Inside of each of these cylinders is another airtight chamber with four compartments holding compressed air.

When the shipwrecked crew is inside the inner chamber and the doors are tightened, a lever releases it from the outer cylinder which is immediately attached to the side of the submarine. The cylinder containing the men is constructed in such a manner that it will float, automatically, to the surface even from a depth of 600 feet.

Any Woman Can Look Stylish

Most stylish looking women know simple ways to make their things conform to the latest fashion styles. Thousands have learned how easily they can transform a dress, blouse, or coat, by the quick magic of home tinting or dyeing. With this, fadless Diamond Dyes, anyone can do this successfully. The "know-how" is in the Diamond Dyes. Don't be streak or spot like inferior dye. New, fashionable tints appear like magic over the out-of-style or faded clothes. Tinting with Diamond Dyes may be done in fifteen minutes and cost just a little more time. Only Diamond Dyes produce perfect results. They have been perfected by experts, every experience. Insist on them and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Opening of Bay Route

Suggestion Is Made to Hold Monster Excursions From All Parts of Canada

By way of establishing an "entente cordiale," Mr. Moss Thrasher, secretary of the United Farmers of Canada, Saskatchewan section, suggests that the opening of the Hudson Bay trade route to Great Britain be celebrated by a huge excursion from all parts of Canada, the mid-western states and Great Britain, the meeting place to be on the shores of the bay.

Mr. Thrasher also suggests that at the same time the Federal government should take steps to eliminate all trade restrictions with the Mother Country and bend every effort toward centralizing the huge purchasing power of western Canada in Great Britain, where, he points out, the western farmers sell the bulk of their products.

He believes that this would be the best logical step towards solution of western Canada's immigration as well as industrial problem, and that something should be done when the west is more closely linked with the Old Country by the opening of the Hudson Bay route.

"Western Canada sells its surplus products in Great Britain," he says, "and accordingly should buy manufactured products required from that source. No country can buy so successfully by selling to one market and buying from another. Someone will have to suffer. The lack of balance will eventually be felt."

NEW HOTEL AT LETHBRIDGE

The Marquis Hotel, Lethbridge, Alta., which has been recently opened to the public, under the management of Mr. A. W. Edwards. The Marquis is fully modern in all its appointments, is a decided asset to the city of Lethbridge, and is proving quite popular with the travelling public. The Marquis Hotel was named after the new variety of wheat of that name, and was built as a community enterprise at a cost of \$275,000.

Cattle Feeding Azins

C. B. Latta, Govan, Wins Prize in Connection With Saskatchewan Competition

C. B. Latta, Govan, Sask., won the first prize of \$100 in the carload lot contest staged in connection with the Saskatchewan farmers' cattle feeding competition, according to the report of the judges' awards received by Hon. C. M. Hamilton.

Mr. Latta also won second prize, \$45, in the competition for groups of ten to fifteen animals, and second prize of \$20 in the group of five animals, making a total of \$165 in prize money. In addition he sold his steers at good prices. Mr. Latta made a gross profit of \$49.62 per head on his carload lot; \$43.17 per head on his group of ten, and a gross profit of \$17.70 per head in his group of five. C. J. Peters, of Bromewick, won second prize, amounting to \$75 for the records made by his carload lot. Mr. Peters made good profits. A total of 10 steers were sold at a gross profit of \$58.36. A net profit of over \$20 per head. Among other prize winners, B. A. Wright, Drivewater, won fourth prize in the carload lot, and also fourth for group of five.

Many Planes in Pageant

The first aerial mail service between Canada and the United States was inaugurated October 4 at St. Paul, Minn., near Montreal, where a great aerial pageant, in which fifty planes took part, commenced at 9 o'clock in the presence of thousands of spectators. Planes of every size, even very close, Moths, Red Hammers, Swallows, Cabin-type, Victors-Pairchild, Stinson-Detroit, Avro Avian, as flown by Liniker from England to Australia, Leaning Amphibian, Pioneer Mailwing, tri-motor Ford, and the most interesting of all, three Sikken fighters, participated in the evolutions. The Sikkins were sent by the Royal Canadian Air Force, and are reputed to be the most deadly warning machines in existence.

They were seated across the table from each other in the restaurant, the wealthy octogenarian and the gold digger.

"Will you marry me if I have my health rejuvenated?" he asked.

"I'll marry you, all right," she replied, "but you leave your health the way it is."

She—"I've been trying to think of a word for two weeks."

He—"How about fortnight?"

Poverty is no disgrace. At least it is better than having a multi-millionaire with chronic indigestion.

The herd of 700 buffalo bought in 1907 by the Dominion of Canada in Montana, lost, now numbers 14,000.

DIARRHEA Was So Bad Child Passed Blood

Mrs. Harry Noblit, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhea and before I knew it he was passing blood. I went to our medicine chest and gave him a dose of

DeFowler's Wild Strawberry.

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child.

This wonderful blood purifier remedy has been on the market for over 25 years; put up only by T. Millura Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

OCTOBER 14

SPIRITUAL GIFTS

Golden Text: "Now abideth faith, hope, these three; and the greatest of these is love."—1 Corinthians 13:13.

Lesson: 1 Corinthians 12-14.

Devotional Reading: "John 4:7-16"

Explanations and Comments

Spiritual Gifts are Diverse, But the Spirit is the Same, 12:4-7.—There was rivalry among the Corinthians as to which of them possessed the greatest gift for God's service. "The tendency at Corinth was to estimate spiritual gifts by their showy rather than their solid character." The reverse was Paul's way.

"The things we consider most remarkable," says Paul, after he has listed them, "are less important. All ecstasy is pleasant, but strength to endure with fidelity is more significant. The foolishness and test of our Christianity is our avowal of Jesus Christ. If in our souls we own him Lord we are possessed of the Spirit of Life." (John Gardner).

There are different gifts. Paul wrote the Corinthians, but the same Spirit reveals himself in them all; there are different ways of manifestation of the Spirit, but back of them all is the same Lord; there are different sorts of activities, but they are all wrought by the same God. To each one he gives his manifestation of the Spirit in the good of others.

Then, after seven to eleven Paul mentions various spiritual gifts and repeats that different as they are, they are alike in source, the Spirit, and in purpose, as he has said. Paul does not disparage spiritual gifts, he realizes their value, but he realizes also the need of unity and co-operation in the church, and he enforces in verses 12-13 by his figure of the body and its members, as all of the members are different, yet they are all one, and it is with the church and its members.

Descriptive Atlas of Canada

100,000 Copies Distributed to School Children in Old Country

School children in the British Isles will this year receive over 100,000 copies of a descriptive atlas of Canada, provided by the Department of Immigration. This is part of an intensive publicity to induce migration to Canada.

The atlas is distributed free to students in the Old Country, through the central office of the department in London. Agents of the department travel through the country in demonstration vans, carrying copies of descriptive of Canadian industries, and they lecture at the various schools. Copies of the atlas are left with the schoolmasters. Large wall maps are also provided.

The book comprises eighty pages of statistics to compare favorably with the geographies used in Canadian schools. Besides a large number of colored maps, it contains literature dealing with the physical characteristics, climate and industries of the various provinces. Special emphasis is placed on the opportunities open to those who wish to settle on Canadian farms. The maps have been prepared by the Natural Resources Intelligence Branch of the Department of the Interior, and are stated to be of the most modern type.

The atlas is eagerly received by teachers, officials indicate, and is claimed to have very much to do with the increasing desire by young people to look towards Canada as their future home.

Large numbers of the book are also in demand in the United States and thousands of requests for copies have been received from American schools. In congratulating Canadian officials on the excellence of the atlas, teachers over the border admit that geographies used in their schools give a very restricted and often inaccurate conception of this country.

The atlas is particularly in demand in the farming areas in the central States.

Wife (to returning husband at seaside resort): Oh, darling, I'm so glad you came. We heard that some idiot had fallen over the cliff, and I felt sure it was you."

We have often wondered, in our innocent way, whether the way, whether the telephone booth also designed the breakfast nook.

China's new warship is called "Peace." Hereafter it will be called "The Chinese understand a joke."

Makes First Entry
Saskatchewan Farmer Makes Entry
In Grain and Hay Show at Chicago
The distinction of making the first entry in the International Grain and Hay Show to be held at Chicago next December goes to Canada. James A. Pusey, a farmer at Langham, Saskatchewan, has entered samples of Marquis wheat and of rye. Canada always carries off a fair share of the awards at the International Show. In the last 17 years the Dominion has won the world's wheat championship 14 times.

In shipping their choicest teas over land and sea, great tea planters never take any chances of the tea deteriorating in transit. They pack it in aluminum or lead—Red Rose Tea is always packed in aluminum, so it will come to you as fresh and flavorful as the day it was blended. a.w

Protect your machinery

Sun, rain, frost and snow play havoc with machinery, and all implements should be properly housed. Implement sheds do not need to be elaborate and can be erected at low cost. You will save money by saving your machines. It is true economy. Talk it over with our local manager.

About Town and Country

Grand dance in Oyen Theatre after the show "The Big Parade", on Friday, October 10. Oyen Imperial Orchestra. Admission: gent's \$1.00; ladies free.

A whist drive and dance will be held in Oyen Theatre on Thursday evening, October 11, commencing at 8 o'clock sharp. Given under the auspices of the women's guild of All Saints Church. Tickets 75 cents.

We are now booking orders for Bran, Shorts and Middlings for delivery early in November. Let us have your bookings, S. A. Miller.

The Oyen Girl's Recreation Club realized \$75.00 from the whist drive and dance they held last week. This will give them adequate funds for their basket ball uniforms and other desired equipment.

The dining room at the Alberta Hotel has been re-opened by Mrs. W. J. Stock, who hopes to have the patronage of the people of this district as well as the travelling public.

A fine drizzle occurred during Monday night and the early hours of Tuesday morning, precipitation amounting to .02 inch. On Tuesday night a light rain commenced to fall and this morning after a precipitation of .12 inch, turned to snow.

MAHAFFEY—SCHERLING

The wedding of Jenny Elizabeth Scherling and Theodore Paul Mahaffey, was quietly solemnized at the United Church manse, Oyen, on Monday evening October 8, 1928. The ceremony was performed in the presence of immediate relatives by Rev. H. C. Woods. Both the bride and groom are residents of Oyen district.

Born—To Mr. and Mrs. Jerry Mellott (nee Marion Hese) of Colinton, Alta., an eight pound son, Stanley Mason, on September 29, 1928, at Athabasca Municipal hospital. Mother and baby are doing nicely.

The women's guild of All Saints Church will hold their annual bazaar on Saturday, December 1, 1928.

Mr. Arthur Anderson had the misfortune to break a leg last night and is now in Oyen Hospital under the care of Dr. S. R. McGregor.

Mrs. Robert Nisbet, who underwent an operation in Kindersley hospital, a week ago last Monday, is making a splendid recovery and will return to Oyen next Monday. Mr. Nisbet was a Kindersley visitor last Sunday.

Typewriter Supplies At The News Office

Here and There

(144)
An effort is being made to establish an airport at Banff, Alberta. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

A further supply of airplanes and airplane parts arrived in Montreal recently when the Canadian Pacific freighter "Beaverford" brought two de Havilland biplane planes, one case of wings and two cases of spare parts.

A call for tenders for a large elevator with a capacity of 1,500,000 bushels has been sent out by the Saint John Harbor Commission. The new structure is to be erected on the Colwell Fuel Company's site, in West Saint John, the work of construction to be got under way as soon as possible.

A Cadillac sedan equipped with rubber insulated steel flanged wheels has been specially equipped by the Angus Shops of the Canadian Pacific Railway at Montreal for the use of the engineering department of that company on inspection trips. The machine has an extra braking system operated by steering wheel and can make as great a speed on the rails as it can on the highway. Over seventy miles an hour was made on a trial run.

A big black bear tried to stop a Canadian Pacific freight train the other day near Aradale station in Northern Pontiac county in Ontario. The bear evidently wandered on to the tracks during the night and was blinded by the glare of the headlight. Black bears are found throughout Eastern Canada but are not often seen, except during the berry season, as they are night prowlers.

Addressing the Board of Trade of Vancouver, recently, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, stated that present prosperity in Canada is clearly indicated by four main factors: Record of railway car loadings (showing the volume of business), employment returns, reports of financial houses, and building construction. These indices were of special value, he remarked, because of the wide range of activity which they reflect. The gross earnings of the company, he added, had been greatly decreased, however, by reduced freight rates.

RUGBY

THE IDEAL GRAIN TRUCK

THE Rugby One Ton Truck is designed to give long service at low cost, and is built to a quality standard for surpassing its moderate initial cost.

The cab of the Rugby is of the closed De Luxe type, while the cowl is part of the chassis and bolted around its full contour, making a rigid, permanent and weatherproof job. There is ample tank capacity in the Rugby, with speedy unloading from trap in floor or end gate.

FEATURES
